

Comments regarding MB Docket No. 04-233

I listen to KLOVE on 91.1 FM in Fresno California. With this file I'm sending you my opinion with regards to **MB Docket No. 04-233**.

First, KLOVE serves me personally in that it helps me to keep my focus on what's important in life. It lifts my spirits and puts a smile on my face. It also makes me aware of needs in the community where I can be of help.

Secondly, if my KLOVE station were to be replaced by an LPFM station, it is my opinion that this would prove to have a negative impact on my community. Since so many families that listen to KLOVE have children of all ages, if they don't have this particular station to listen to, there is the potential for increased mischievous behavior which could lead to criminal behavior. I do not want that to happen!

Finally, the service provided by the KLOVE radio network serves the public interest because it gives people, and kids in particular, a positive influence in their lives. It gives them something to occupy their time, but more importantly, shows them a positive perspective on life with wholesome values which can ultimately lead them down a path that helps them avoid negative activities that can impact a (my) community.

Thank you for your time.

Don Thiesen
